

The National Cancer Screening Register (NCSR) supports Australia's lung, bowel and cervical cancer screening programs by:

- Maintaining a digital record for each participant,
- Sending invitations and reminders, and
- Following up with individuals who have abnormal results.

Timely and accurate clinical information helps ensure patients are placed on the correct screening pathway and receive appropriate follow-up.

IN THIS GUIDE

- 1 Role of Respiratory Physicians
- 2 Delegating access to support staff

1 THE ROLE OF RESPIRATORY PHYSICIANS

Respiratory physicians support participants of the National Lung Cancer Screening Program with Category 5 or 6 results, determining the diagnostic pathway and confirming diagnoses after Requesting Practitioner referral.

You'll need to submit a Diagnosis Form to the NCSR. This form is essential for confirming the diagnosis, ensuring the participant is placed on the correct screening pathway, informing next steps such as rescreening or exiting the Program, and supporting monitoring of the Program's effectiveness.

You may also need to submit a **Biopsy Adverse Events Form** to report any complications from diagnostic biopsy procedures, to support monitoring Program safety and quality.

HOW TO SUBMIT FORMS

- **Healthcare Provider Portal:** NCSR.gov.au/hcp-portal
- **Manual forms** can be downloaded from the [NCSR website](#) and faxed to: **1800 154 854**

2 DELEGATING ACCESS FOR SUPPORT STAFF

Support staff can be given delegate access to the Healthcare Provider Portal by a registered user with a Medicare Provider Number.

- Support staff requesting delegate access must first create a PRODA account, navigate to the NCSR Healthcare Provider Portal and submit their delegate access request
- The delegating provider can then log into the Portal within PRODA using their Medicare Provider Number and select **My Profile**
- Next, the provider selects **Manage Delegation** to view existing delegates and new requests
- Requests for access will have a status of **Pending**, click **Accept** to approve requests
